magpie

THE MARKET REP OFFER

A 150-business market pays you ~$17,000 a month.

Own the exclusive sales seat in your hometown market. Commission only — no salary, no draw, nothing paid up front. You activate local businesses, and you earn on every dollar your market collects.

THE DEAL, ON ONE PAGE

You sell Magpie to local businesses. Here's exactly what you earn.

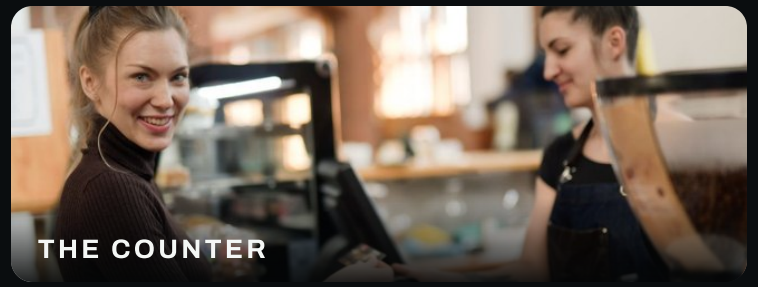

25%
of collected revenue on every business you activate

5%
residual on every other business activated in your market — whoever brought it in, once your seat vests

30–35%
your direct rate as your kept book grows — 30% at 25+ held, 35% at 75+ held, plus a growth kicker

1
rep per market. The seat is exclusively yours while you perform

$0
paid up front — every dollar is a cut of money already collected

Your market is the businesses you already walk into — cafés, kitchens, barbershops, boutiques. A business pays your direct rate or the 5% residual — never both. Commissions run 12 months per business, from its activation month. Magpie's platform records govern every payout.

THE PRODUCT

Three plans. One simple commission.

$199 / month
BUSINESS PLAN

$49.75 / mo
you earn at 25% · $69.65 at the 35% top tier

$597 over the 12-month window at 25%

$349 / month
BUSINESS PLAN

$87.25 / mo
you earn at 25% · $122.15 at the 35% top tier

$1,047 over the 12-month window at 25%

$699 / month
BUSINESS PLAN

$174.75 / mo
you earn at 25% · $244.65 at the 35% top tier

$2,097 over the 12-month window at 25%

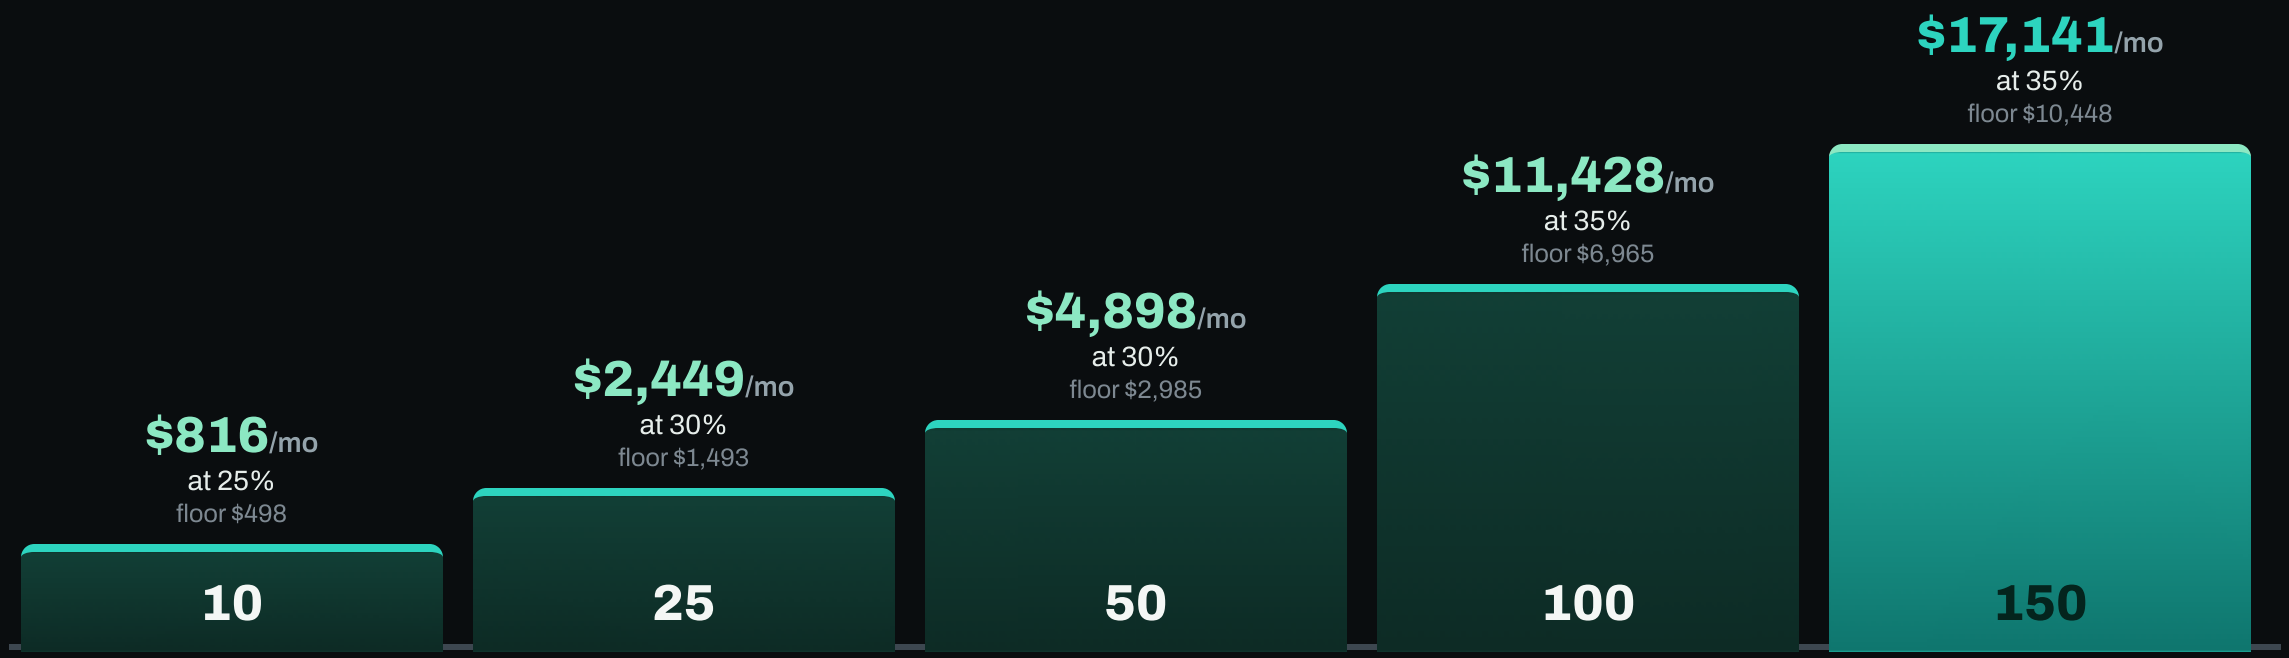

On a blended book* you earn **$81.63 / mo** per business at 25% — **$114.28** at the top tier — **$980** over its 12-month window at 25%. A held book of 25+ pays the 30% tier: $97.95 a month on a blended business.

*Blended book assumes a 50% / 35% / 15% mix across the $199 / $349 / $699 plans = $326.50 average revenue per business per month. A planning assumption, not a forecast.

THE MATH

What a book pays, as it grows.

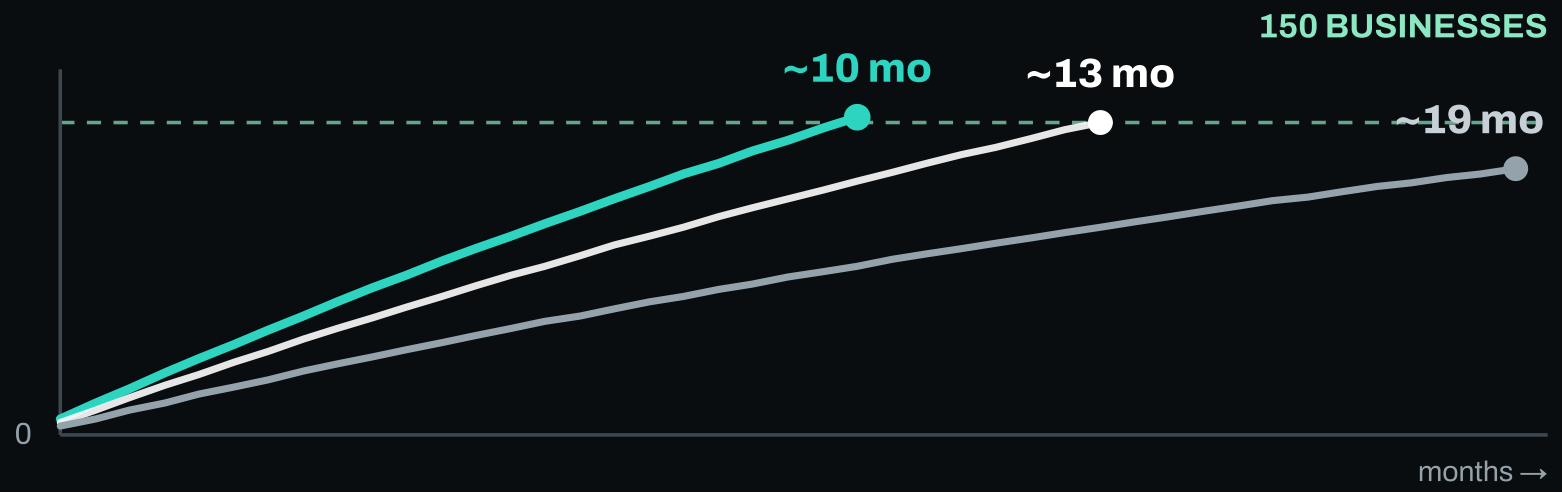

ACTIVE BUSINESSES IN YOUR BOOK →

YOUR COMMISSION PER MONTH, AT THE TIER THAT BOOK SIZE PAYS

ACTIVE BUSINESSES	MARKET REVENUE / MO	YOUR RATE	YOU EARN	FLOOR: ALL $199, AT YOUR RATE
10	$3,265	25%	**$816 / mo**	$498 / mo
25	$8,163	30%	**$2,449 / mo**	$1,493 / mo
50	$16,325	30%	**$4,898 / mo**	$2,985 / mo
100	$32,650	35%	**$11,428 / mo**	$6,965 / mo
150	$48,975	35%	**$17,141 / mo**	$10,448 / mo

THE CLIMB

How long to 150? It depends on your pace.

+15 net / month

~10 months to 150 · ~20 new signings a month needed near the top*

+12 net / month

~13 months to 150 · ~17 new signings a month needed near the top*

+8 net / month

~19 months to 150 · ~13 new signings a month needed near the top*

Honest math: businesses churn. We plan on roughly 3% of the book leaving per month once accounts pass their 3-month minimum, so holding a 150 book means adding about 5 businesses a month just to stand still. Your pace above is net — signings minus churn. *Gross signings needed at a 150 book to keep growing at that net pace, after replacing churn.

The first months are the grind — small book, small check. The math on page 4 is why reps who stay, win.

THE TARGET: 150 BUSINESSES IN YOUR MARKET

$17,141 /month

Your commission at a 150-business book, at the 35% top tier, blended mix. That's $205,695 a year — built one hometown business at a time.

$48,975

your market's revenue per month at 150 businesses

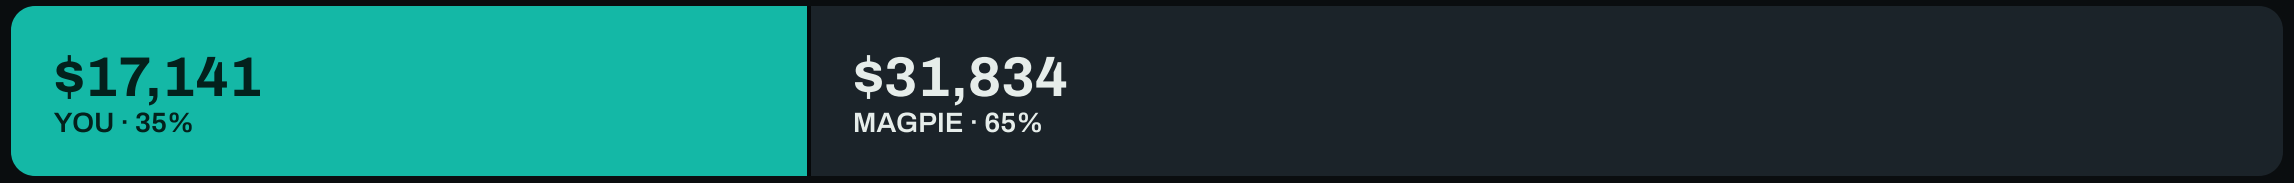

65%

Magpie keeps $31,834 / mo even at your top rate — the split never passes 50/50

5%

you also earn on market businesses you didn't sign, once your seat vests — **$16.33 / mo** per blended business

A 150-BUSINESS MARKET, SPLIT

THE ACCELERATOR

The rate follows the book you keep.

25%

Base rate

On every business you activate, from day one.

30%

25+ businesses held

Your direct rate in any month your book is 25+ at month end and didn't shrink.

35%

75+ businesses held

The top tier, on the same test. The tier replaces the base rate that month — the 5% residual never tiers up.

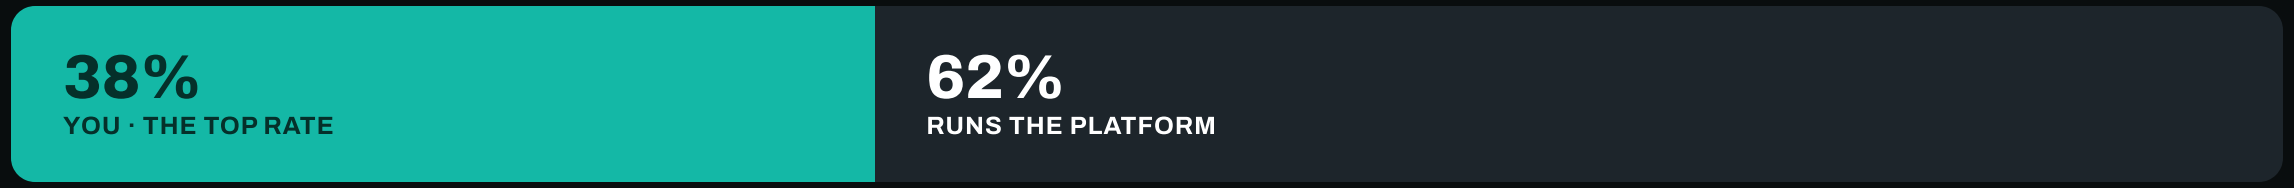

Plus: the growth kicker. Add 5 or more new activations in a month and you earn +3 points on that month's direct commissions. The kicker stacks on your tier — the most any dollar can ever pay is 38% (35% tier + kicker).

Why this shape: paying a bonus for raw signups buys churn-and-burn — reps racing to sign businesses that leave in month four. Paying for a retained book buys a real territory: a rep who keeps 25+ businesses happy earns the higher rate every month they hold it.

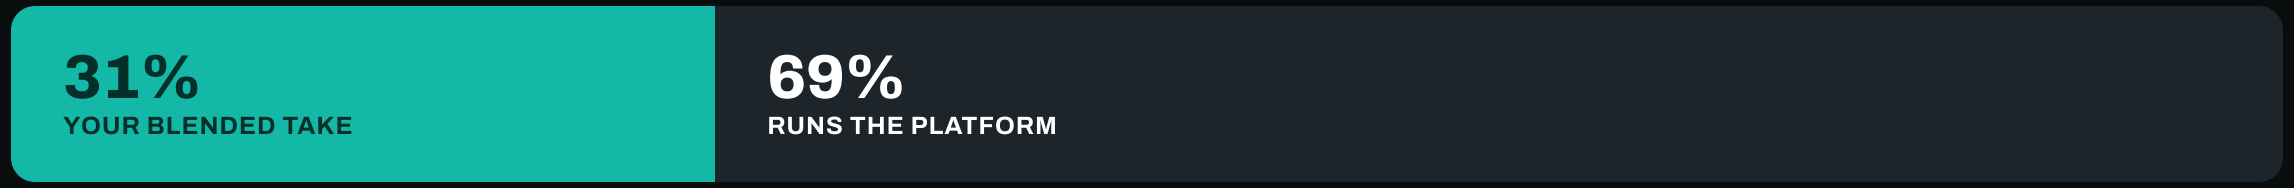

YOUR CUT — GUARANTEED IN WRITING

Your cut is locked in writing — and it only goes up.

THE TOP RATE — EVERY DOLLAR AT YOUR HIGHEST POSSIBLE RATE

A REAL BOOK — 120 YOU SIGNED, 30 YOU DIDN'T — ≈ $15,400 A MONTH TO YOU

38% = the top rate

Imagine the extreme: every business in your market is one you activated personally, you're on the 35% tier, and the growth kicker is on. That's the most this plan can pay — and every point of it is yours to earn.

In real dollars

A dollar pays your direct rate if you activated it, or 5% if someone else did — never both. Example: 120 direct at 38% + 30 residual at 5% = a 31% blended take, about $15,400 a month.

Why it's permanent

Magpie keeps at least 62% of every market in the absolute worst case — and 65–75% in normal operation. That's the point: the math works without ever squeezing you, which is why this offer can afford to be permanent.

THE EXCLUSIVE SEAT

Exclusivity is earned, kept — and losing it doesn't take your earnings.

EARN IT

- You start on probation: 25% direct, no exclusivity, no residual.
- The seat and the 5% residual vest at the earlier of 15 cumulative activations, or 3 straight months with 3+ activations each.

KEEP IT

- Reviewed monthly. You're at risk after a month with zero new activations (while your book is under 50), two straight months of net shrinkage, or losing 20%+ of your book in a month.
- One written warning month before the seat lapses. Fraud or misconduct ends it immediately.

IF YOU LOSE IT

- Your commissions on your existing book keep paying for each business's full 12-month window, at the tier that business already carries.
- The seat can be refilled — but you may keep selling non-exclusively at 25% direct, if Magpie agrees.

The seat is a route, walked daily

YOU DON'T SELL COLD

"You bring the hometown. We bring the map, the lists, and the receipts."

YOUR TOOLKIT

- A stored target list for your market — named businesses, owners, categories. Built before you start.
- Named, ranked creators from Magpie's match engine, ranked by verified local audience — the proof you walk in with.
- Supply-gap maps showing exactly which categories your market still needs, so every pitch lands on a real gap.
- Your scoreboard — activations, book size, commissions — computed from platform records, with a monthly statement.

THE FINE PRINT, IN PLAIN WORDS

- Commission only: no salary, draw, or expenses. Independent contractor.
- Paid on collected revenue only. Clawback only on money refunded inside a business's 3-month minimum term.
- Tracked links and codes attribute every activation; platform records govern.
- Either side can end the arrangement; commissions already earned survive.
- Magpie is pre-launch: commissions accrue from each activation and are paid monthly once your market opens for payments.
- The $250 champion introduction bounty is a separate program and is not part of rep compensation.

Full stipulations live in the companion document: Biz-Dev Comp — Full Stipulations (Lean). The signed agreement controls.

THE MARKET REP OFFER

Your hometown already has the businesses. Now it has a seat.

Commission only. $0 up front. A 150-business market pays ~$17,000 a month — and your take never passes 50% of revenue, so the offer can afford to be permanent.
